What would a building in this scenario look like after transformation?	
Political and community support	Everybody on board	😊																																																
Cost	Very expensive	😞																																																
Local Economy	Local economic engine	😊																																																
Market Potential	Great market opportu.	😊																																																
Social Impact	Social heaven	😊																																																
Accesibility	Reachable and accesible	😊																																																
Building Technology	Technical tour de force	😊																																																
Environmental impact	Sustainability heaven	😊																																																
Indoor environmental quality	Healthy indoor climate	😊																																																
Rules and regulations	Following the rules	😊																																																
Flexibility and adaptability	Flexible and adaptable	😊																																																
Durability and quality	Strong and durable	😊																																																
Physical characteristics	Big and versatile	😊																																																
Architectural value	Archictectural beauty	😊																																																
Historical and cultural value	Preserving history	😊																																																
<div>What is the trigger for adaptive reuse in the scenario?</div> <div>examples:<ul style="list-style-type: none">• Market volatility• Demographic changes• Technological progress• Changing user needs• Obsolescence• Building decay</div>		 What would the location and surroundings of a building in this scenario look like?		 For what function / function changes would this scenario be appropriate?																																														
 What type of stakeholders are important in this scenario?		 What does the timeline in this scenario look like?		 What example projects would fit in this scenario?
